

**ABSTRACT**

The present invention provides a tire/wheel assembly that ensure a proper function of a tire-information transmitter even in a severe use condition, installation and fixing devices for the tire-information transmitter which has a superior workability, and a method of mounting a tire-information transmitter in a simple manner.

In a tire/wheel assembly in which the tire is mounted on the wheel, a ring-shaped elastic body equipped with a tire-information transmitter is provided along a periphery of the rim base of the rim of the wheel.
